

Royal Denship-New Range

## **Biresin® M72 – the fastest model paste in the market**

**Ideal for large scale models such as boats and rotor blades**

- Adaptable viscosity to individual requirements for highest output rates
- Perfect mixing is ensured by airless dispensing system to eliminate soft-spots
- Can be pumped more than 10 m – therefore easily adapted to automatic application systems
- Continuous working – top-up system instead of drum changes
- Low inherent stress allows application to largest areas
- No postcuring necessary – saves 1 day for large scale models
- Milling possible after 8 hours
- Very low dust when milling
- Attractive price

For more informations about additional PUR paste systems – such as **Biresin® M75** (direct tooling) and **Biresin® M73** (higher Tg value) – please contact [tooling@de.sika.com](mailto:tooling@de.sika.com).
