

**SikaBlock® M970**  
**really**  
**does more!**

Normal foundry block material

New abrasion class with SikaBlock® M970

## **SikaBlock® M970 – safely from prototyping to series production.**

High abrasion resistant core boxes –  
from prototyping to series production with only one material.

### **Your advantages:**

- Very high abrasion resistance and rib stiffness
- Fast milling and excellent surface finish
- High dimensional stability with very low CTE-value
- Fast and abrasion resistant bonding with Biresin® U1320 / U1303
